NOTE

For patients being monitored for gestational diabetes, it should be noted that once the blood sugar result appears on the myDiabby application, it must be associated with a time of day. To do this, **CHECK** or **VERIFY** the time of day so that the result is placed in the right place in the logbook.

FORA DIAMOND MINI

The Fora Diamond Mini blood glucose meter connects directly via Bluetooth to the myDiabby application.

When you link your blood glucose meter to the myDiabby application, the date and time are automatically set on the meter based on the date and time on the phone.

Pairing of the meter

- 1 **Enable Bluetooth** on the smartphone
- 2 Log in to the **myDiabby application** and open the **"My connected objects"** tab
- 3 Select **"Connect my capillary blood glucose meter"**, then select your meter from the list
- 4 Click on the **"Connect my meter"** button
- 5 **Enable Bluetooth on the meter** by turning it on and off. To do this:
 - Insert a test strip into the meter
 - Wait 1 second until the meter turns on and is ready to test
 - Remove the test strip from the meter

The meter turns off and the **blue light flashes: the meter's Bluetooth ⓧ is on.**

6 On the myDiabby application, click on the "Find my meter" button

7 The meter appears on the screen. Click on "Add".

Your meter is now linked to your myDiabby application!

Daily use

1 Test your blood sugar level with the meter as usual.

2 Once the blood sugar result appears on the meter screen, remove the strip from the meter and open the myDiabby application on the phone near the meter.

(make sure Bluetooth is enabled on the smartphone)

3 The blood sugar result is automatically sent to the myDiabby application!

PLEASE NOTE

- If you have specified the before/after meal symbol on the meter, it will be transferred to myDiabby.
- When you see the blood glucose level on the myDiabby application, you can add other information (insulin dose, meals eaten, comments, etc.)
- All blood sugar readings from the meter that have not yet been uploaded to the myDiabby application are transferred at once.

ONETOUCH VERIO FLEX

The OneTouch Verio Flex blood glucose meter connects directly via Bluetooth to the myDiabby application.

When you link your blood glucose meter to the myDiabby application, the date and time are automatically set on the meter based on the date and time on the phone.

Pairing of the meter

- 1 **Enable Bluetooth** on the smartphone
- 2 Log in to the **myDiabby application** and open the **"My connected objects"** tab
- 3 Select **"Connect my capillary blood glucose meter"**, then select your meter from the list
- 4 Click on the **"Connect my meter"** button
- 5 **Turn on the OneTouch Verio Flex reader**
- 6 **Activate Bluetooth on the meter by pressing the ▲ and OK buttons simultaneously.**
The Bluetooth logo  appears on the screen of the meter. (If the Bluetooth symbol  was already lit on the meter, you can skip to step 6).
- 7 On the myDiabby application, click on the **"Find my meter"** button

2

3

4

6

7

- 8 The meter appears on the screen. Click on "Add".

- 9 Enter the 6-digit code that appears on the meter's screen in the application, then confirm.

The OneTouch Verio Flex meter is now paired to the myDiabby application!

Daily use

- 1 **Test your blood sugar level** with the meter as usual.
- 2 Once the **blood sugar result appears on the meter screen**, **remove the strip from the meter and open the myDiabby application on the phone near the meter.**
Make sure Bluetooth is enabled on the smartphone
- 3 The blood sugar result is automatically sent to the myDiabby application!

PLEASE NOTE

- If you have specified the before/after meal symbol on the meter, it will be transferred to myDiabby.
- When you see the blood glucose level on the myDiabby application, you can add other information (insulin dose, meals eaten, comments, etc.)
- All blood sugar readings from the meter that have not yet been uploaded to the myDiabby application are transferred at once.

ONETOUCH VERIO REFLECT

The OneTouch Verio Reflect blood glucose meter connects directly via Bluetooth to the myDiabby application.

When you link your blood glucose meter to the myDiabby application, the date and time are automatically set on the meter based on the date and time on the phone.

Pairing of the meter

1 Enable Bluetooth on the smartphone

2 Log in to the myDiabby application and open the **"My connected objects"** tab

3 Select "Connect my capillary blood glucose meter", then select your meter from the list

4 Click on the "Connect my meter" button

5 Turn on the OneTouch Verio Reflect meter by long pressing the OK button.

6 Enable Bluetooth on the meter

- In the meter's menu, select "Settings", then "Bluetooth"
- Select "On"
- Press the back button (left arrow) to return to the meter's home screen
- The  (Bluetooth) symbol is lit up on the top right of the meter's screen

7 On the myDiabby application, click on the "Find my meter" button

7

8 The meter appears on the screen.
Click on "Add".

9 Enter the 6-digit code that appears
on the meter's screen in the
application, then confirm.

The OneTouch Verio Reflect meter is now paired to the myDiabby application!

Daily use

1 Test your blood sugar level with the meter as usual.

2 Once the **blood sugar result appears on the meter screen**,
remove the strip from the meter and open the myDiabby
application on the phone near the meter.
Make sure Bluetooth is enabled on the smartphone

3 The blood sugar result is automatically sent
to the myDiabby application!

PLEASE NOTE

- If you have specified the before/after meal symbol on the meter, it will be transferred to myDiabby.
- When you see the blood glucose level on the myDiabby application, you can add other information (insulin dose, meals eaten, comments, etc.)
- All blood sugar readings from the meter that have not yet been uploaded to the myDiabby application are transferred at once.

ONETOUCH ULTRA PLUS REFLECT

The OneTouch Ultra Plus Reflect blood glucose meter connects directly via Bluetooth to the myDiabby application.

When you link your blood glucose meter to the myDiabby application, the date and time are automatically set on the meter based on the date and time on the phone.

Pairing of the meter

1 Enable Bluetooth on the smartphone

2 Log in to the myDiabby application and open the **"My connected objects"** tab

3 Select "Connect my capillary blood glucose meter", then select your meter from the list

4 Click on the "Connect my meter" button

5 Turn on the OneTouch Ultra Plus Reflect meter by long pressing the OK button.

6 Enable Bluetooth on the meter:

- In the meter's menu, select "Settings", then "Bluetooth"
- Select "On"
- Press the back button (left arrow) to return to the meter's home screen
- The  (Bluetooth) symbol is lit up on the top right of the meter's screen

7 On the myDiabby application, click on the **"Find my meter"** button

8 The meter appears on the screen. Click on "Add".

9 Enter the 6-digit code that appears on the meter's screen in the application, then confirm.

The OneTouch Ultra Plus Reflect meter is now paired to the myDiabby application!

Daily use

1 Test your blood sugar level with the meter as usual.

2 Once the **blood sugar result appears on the meter screen**, remove the strip from the meter and open the myDiabby application on the phone near the meter.
Make sure Bluetooth is enabled on the smartphone

3 The blood sugar result is automatically sent to the myDiabby application!

PLEASE NOTE

- If you have specified the before/after meal symbol on the meter, it will be transferred to myDiabby.
- When you see the blood glucose level on the myDiabby application, you can add other information (insulin dose, meals eaten, comments, etc.)
- All blood sugar readings from the meter that have not yet been uploaded to the myDiabby application are transferred at once.

CONTOUR NEXT

The Contour Next blood glucose meter connects directly via Bluetooth to the myDiabby application.

Pairing of the meter

 Before starting, make sure the meter is set to the **same date and time as the phone**. If not, set it according to the meter's instructions.

1 Enable **Bluetooth** on the smartphone.

2 Log in to the **myDiabby** application and open the **"My connected objects"** tab

3 Turn on the Contour Next meter by long pressing the **OK** button.

4 Enable **Bluetooth** on the meter by long pressing the **▲** button.

The Bluetooth logo  appears on the meter's screen.

5 In the **myDiabby** application, click on the button **"Connect my capillary blood glucose meter"** and then **"ASCENSIA Contour NEXT"**.

6 Click on the **"Connect my meter"** button.

7 Enter the **6-digit code** that appears on the meter's screen in the application, then confirm.

- 8 The meter appears on the screen. Click on **"Add"**.

Your meter is now linked to your myDiabby application!

8

Daily use

- 1 Test your blood sugar level with the meter as usual.

- 2 Once the blood sugar result appears on the meter screen, **remove the strip from the meter**.

- 3 The blood sugar result is automatically sent to the myDiabby application!

If you need to change the meal or time of day for this blood sugar level, you can click on it and enter the relevant information.

PLEASE NOTE

- If you have specified the before/after meal symbol on the meter, it will be transferred to myDiabby.
- When you see the blood glucose level on the myDiabby application, you can add other information (insulin dose, meals eaten, comments, etc.)
- All blood sugar readings from the meter that have not yet been uploaded to the myDiabby application are transferred at once.

CONTOUR NEXT ONE

The Contour Next One blood glucose meter connects directly via Bluetooth to the myDiabby application.

Pairing of the meter

 Before starting, make sure the meter is set to the **same date and time as the phone**. If not, set it according to the meter's instructions.

1 Enable **Bluetooth** on the smartphone.

2 Log in to the **myDiabby application** and open the **"My connected objects"** tab

3 Enable **Bluetooth on your Contour next ONE Blood Glucose Meter**: to do this, **press and hold the OK button** until the **BLUE light on the meter flashes** and the Bluetooth symbol  on the meter screen goes on.

4 Click on the **"Connect my meter"** button, then on **"Find my meter"** to start the pairing.

5 The meter appears on the screen. Click on **"Add"**.

Your meter is now linked to your myDiabby application!

Daily use

- 1 Test your blood sugar level with the meter as usual.

- 2 When the blood sugar result is shown on the meter's screen, the Bluetooth symbol indicates that the meter is ready to send the result to the myDiabby application.

- 3 Make sure that **Bluetooth is enabled on the smartphone**, and **open the myDiabby application**, next to the meter still on.

- 4 The blood sugar result is automatically sent to the myDiabby application!

If you need to change the meal or time of day for this blood sugar level, you can click on it and enter the relevant information.

PLEASE NOTE

- If you have specified the before/after meal symbol on the meter, it will be transferred to myDiabby.
- When you see the blood glucose level on the myDiabby application, you can add other information (insulin dose, meals eaten, comments, etc.)
- All blood sugar readings from the meter that have not yet been uploaded to the myDiabby application are transferred at once.

DINNO PREMIER CARESENS

The Dinno Premier Caresens blood glucose meter connects directly via Bluetooth to the myDiabby application.

Pairing of the meter

⌚ Make sure the meter is set to the correct date and time to use connectivity with the myDiabby application.

1 Enable **Bluetooth** on the smartphone

2 Log in to the **myDiabby** application and open the **"My connected objects"** tab

3 Select **"Connect my capillary blood glucose meter"**, then select your meter from the list

4 Click on the **"Connect my meter"** button

5 Put the meter in pairing mode.
To do this:

- Turn on the meter using the **S** button
- Press and hold the S button until you see **"SET"** appear on the meter's screen.
- Press the button ► to see **"Yes"** at the bottom left of the screen, then press the **S** button
- **"bT"** appears on the meter's screen. Press ► 3 times to see **"PAir"** appear on the bottom right of the meter's screen. Then **press the S** button.
- The word **"Pin"** appears on the meter's screen

- 6 On the myDiabby application, click on the "Find my meter" button

- 7 Enter the 6-digit code that appears on the meter's screen in the application, then confirm.

- 8 The meter appears on the screen. Click on "Add".

The Dinno Premier Caresens meter is now paired to the myDiabby application!

Daily use

- 1 Test your blood sugar level with the meter as usual.

- 2 Once the blood sugar result appears on the meter screen, **remove the strip from the meter**.

- 3 Open the myDiabby application near the meter.
(Make sure Bluetooth is enabled on the smartphone).

- 4 The blood sugar result is automatically sent to the myDiabby application!

PLEASE NOTE

- If you have specified the before/after meal symbol on the meter, it will be transferred to myDiabby.
- When you see the blood glucose level on the myDiabby application, you can add other information (insulin dose, meals eaten, comments, etc.)
- All blood sugar readings from the meter that have not yet been uploaded to the myDiabby application are transferred at once.

MYLIFE UNIO NEVA

To share data from the Unio Neva meter on myDiabby Healthcare, you need to use the mylife App.

Linking the meter with the myDiabby application

- 1 **Download the 2 applications myDiabby and mylife to the phone. Log in to each of the 2 applications.**

The mylife application collects data from the Unio Neva blood glucose meter. Mylife will then automatically send the data to myDiabby Healthcare, which is the application that connects you with your healthcare team.

- 2 **Connect the Unio Neva blood glucose meter to the mylife app via Bluetooth by following the meter guide.**

- 3 **Log in to the myDiabby application and open the "My connected objects" tab**

- 4 **Select "Connect my capillary blood glucose meter", then "MYLIFE Unio". Click on the "Connect my health application" button**

- 5 Enter **your mylife App** account login details and confirm

- 6 The data from mylife Unio Neva is now shared on the myDiabby application!

PLEASE NOTE

- All data entered manually or via Bluetooth in the mylife application is shared with the myDiabby application (pump data, blood sugar levels, meals, etc.).
- Once the Mylife and myDiabby Healthcare accounts are connected, data is regularly sent automatically. This sending may cause a delay between the synchronization of data on Mylife and their display on myDiabby Healthcare.

ACCU-CHECK GUIDE

Pairing of the meter

- ⌚ Make sure the meter is set to the correct date and time to use connectivity with the myDiabby application.

1 Enable Bluetooth on the smartphone

2 Log in to the **myDiabby** application and open the **"My connected objects"** tab

3 Select **"Connect my capillary blood glucose meter"**, then select your meter from the list

4 Click on the **"Connect my meter"** button

5 Put the meter in pairing mode. To do this :

- Turn on the meter with the **OK** button
- In the meter menu, go to **"Settings"** and then **"Wireless"**
- When asked "No devices linked. Do you want to establish a connection?" Answer **YES**
- A **6-digit pin code** appears on the meter's screen.

- 6 On the myDiabby application, click on the "Find my meter" button

- 7 Enter the 6-digit code that appears on the meter's screen in the application, then confirm.

- 8 The meter appears on the screen. Click on "Add".

Daily use

- 1 **Test your blood sugar level** with the meter as usual.
- 2 Once the blood sugar result appears on the meter screen, **remove the strip from the meter**.
- 3 **Open the myDiabby application** near the meter.
(Make sure Bluetooth is enabled on the smartphone).
- 4 The blood sugar result is automatically sent to the myDiabby application!

ACCU-CHECK MOBILE

Pairing of the meter

-  Make sure the meter is set to the correct date and time to use connectivity with the myDiabby application.

- 1** Write down the serial number of the Bluetooth adapter on a piece of paper

- 2** Enable Bluetooth on the smartphone

- 3** Log in to the **myDiabby** application and open the **"My connected objects"** tab

- 4** Select **"Connect my capillary blood glucose meter"**, then select your meter from the list

- 5** Click on the **"Connect my meter"** button

- 6** Connect the Bluetooth adapter to the Accu-Chek Mobile blood glucose meter

- 7** Turn on the Bluetooth adapter by pressing the side button. This turns on the meter and puts it in "pairing mode", and the adapter flashes green.

- 8 On the myDiabby application, click on the "Find meter" button

8

- 9 Enter the 6-digit serial number of the adapter (which you have written down) on the application and confirm.

9

- 10 The meter appears on the screen. Click on "Add".

Your meter is now linked to your myDiabby application!

10

Daily use

- 1 **Test your blood sugar level** with the meter as usual.
- 2 Once the blood sugar result appears on the meter screen, **remove the strip from the meter**.
- 3 **Open the myDiabby application** near the meter.
(Make sure Bluetooth is enaled on the smartphone).
- 4 The blood sugar result is automatically sent to the myDiabby application!

GLUCOFIX® TECH / GLUCOFIX® TECH 2K

NFC connection

Data transfer is done using the NFC antenna by bringing the meter close to your smartphone.

1 Make sure the meter is set to the correct date and time to use connectivity with the myDiabby application.

2 **Enable NFC on your smartphone** (in the settings)
on some smartphones, NFC is enabled by default and cannot be disabled

3 Log in to the myDiabby application and open the **"My connected objects"** tab

4 Select **"Connect my capillary blood glucose meter"**, then select your meter from the list

5 Click on the **"Connect my meter"** button

6 Activate NFC on the meter. To do this:

- 1** Open the player's parameter menu: press the **M (on/off)** and **A** buttons simultaneously for 4 seconds
- 2** Press the **✓** button, an N will flash
- 3** Press the **M** button, "Off" appears
- 4** Press the **✓** button, "On" appears
- 5** Press the **M** button, "SET" appears, the NFC is activated on your player.
- 6** Turn off the meter: press the M button for 3 seconds

7 The search is underway:

- On Android, **bring the meter close to your smartphone at the NFC spot**.
- On iPhone, **bring your insulin pen close to the NFC spot**. Your iPhone will vibrate once the meter is detected and a confirmation will appear on the screen.

Daily use

1 Test your blood sugar level with the meter as usual.

2 Log in to the myDiabby application and open the **"My connected objects"** tab

3 At the meter you have connected, press **"Synchronize"**.

3

4 The search is underway:

- On Android, bring the meter close to your smartphone at the NFC spot.
- On iPhone, bring your insulin pen close to the NFC spot. Your iPhone will vibrate once the meter is detected and a confirmation will appear on the screen.

4

CONTINUOUS BLOOD GLUCOSE MONITORS

FREESTYLE LIBRE

If you are using the FreeStyle LibreLink or LibreView application, go directly to step 3.

- 1 **Create a LibreView account here:**
www.libreview.com/auth/register
- 2 **Upload data** from your FreeStyle Libre player to your LibreView account using a computer and the yellow USB cable supplied with the player.
For help downloading data to LibreView, go to : pat.libreview.io/support
- 3 Log in to the **myDiabby** application and open the «**My connected objects**» tab
- 4 Click on the tab «**My Connected Objects**» tab, then on «**I'm connecting a health application**».

- 5 Select the button **FreeStyle Libre**

- 6 Enter your **FreeStyle LibreLink / LibreView account username and password**.
Read the conditions of use, then click «**Authorise**» to accept data sharing.
- 7 This message appears on the screen and confirms that the **LibreView account is connected to myDiabby Healthcare**.
Click on «**Back**» to return to myDiabby Healthcare.

Your continuous glucose data are now shared on myDiabby Healthcare!

PLEASE NOTE

Regularly upload data from the FreeStyle Libre sensor to LibreView so that the medical team can see the results on myDiabby Healthcare.

>Once LibreView and myDiabby are connected, **LibreView automatically sends continuous glucose data to myDiabby Healthcare as soon as it becomes available**. This may cause a delay of a few minutes between loading the data onto LibreView and displaying it on myDiabby Healthcare.

> If you would like to retrieve data from your FreeStyle Libre meter on myDiabby Healthcare using another method, please consult our help centre: help.diabby.com

Good use document for patients using these medical devices. Please refer to the user manuals for FreeStyle Libre 2, FreeStyle LibreLink and LibreView: <https://www.diabetescare.abbott/support/manuals/fr.html>
The sensor housing, FreeStyle, Libre and associated marks are trademarks of Abbott and used with permission.

DEXCOM CLARITY

To share data from a Dexcom G6, G7, One+ or One monitor, you need to use the **Dexcom Clarity** software:

- 1 - The monitor data is retrieved by the Dexcom Clarity software
- 2 - Dexcom Clarity automatically sends the results to the myDiabby account

THE STEPS

- 1 **Create a Dexcom Clarity account** from this site:
<https://uam2.dexcom.com//index.html#/register>

- 2 **Download the Dexcom Clarity Uploader** from this page:
<https://clarity.dexcom.eu/?locale=fr-FR#/home-user-upload>
Then **upload** the monitor data to Dexcom Clarity by following the instructions on the screen.

- 3 **Log in to the myDiabby Healthcare account** from a computer **OR** the mobile application.

- 4 Click on the **"My Connected Objects"** tab and then on **"Connect my continuous glucose monitor"**.

- 5 Choose the Dexcom button, then click on the **"CONNECT MY HEALTH APPLICATION"** button

5

- 6 Enter your **Dexcom** account login details and password. Read the terms and conditions of use, then enter your name and click **"Allow"** to accept.

6

- 7 This message appears on the screen and confirms that the **Dexcom** account is **connected to myDiabby Healthcare**. Click on **"Back"** to return to myDiabby Healthcare.

7

Continuous blood glucose data is now shared on myDiabby Healthcare!

PLEASE NOTE

Upload the Dexcom meter data to Dexcom Clarity regularly so that the healthcare team can see the results on myDiabby Healthcare.

> Once the **Dexcom** and **myDiabby Healthcare** accounts are connected, data is regularly sent automatically. The data displayed is **3 hours behind** the latest available data.

> If you are using a **Dexcom G6** in combination with the **t:slim X2 Tandem Insulin Pump**, you only need to upload the pump to myDiabby for the **Tandem Pump + G6** monitor data to appear on myDiabby Healthcare.

INSULET OMNIPOD

Method 1 :

Sharing Omnipod on myDiabby via computer

To retrieve the data from the Omnipod, it must be uploaded using the myDiabby Uploader software.

myDiABBY
UPLOADER

myDiabby Uploader is a software program that you can install on your computer to upload data from blood glucose meters, blood glucose monitors and insulin pumps to your myDiabby Healthcare account.

See **page 51** for a **guide to myDiabby Uploader** on Windows or Mac.

Methode 2 :

Sharing pump data with the myDiabby application with a phone

Equipment needed

The **Android smartphone** on which the **myDiabby application** has been downloaded, and patient account **logged in**.

The Omnipod PDM.

An adapter to connect a USB cable to the smartphone.

The Omnipod PDM USB cable.

Please note: The myDiabby team provides adapters free of charge to medical teams for distribution to their patients as part of their care on myDiabby Healthcare.

How to proceed

- 1 Connect in this order:
1 - the cable to the phone with the adapter
2 - the cable to the PDM
- 2 The PDM turns on and emits a beep.
It is preparing the data for transfer.
Please wait.
- 3 The PDM emits 4 times 2 beeps.
It is ready to transfer data to the phone.
- 4 Unlock the smartphone screen. Launch the **myDiabby application** and **data sharing is initiated**.
The **cable symbol flashes** and a **loading bar appears** during data sharing. **Please wait.**

- 5** The PDM indicates 'Your PDM data is ready for export'. Click 'Done'.
- The PDM is now ready to transfer data to the phone
 - The cable symbol will flash and a loading bar will appear while data is being shared.
- Please wait.**

Caution:

Do not disconnect the cable from the meter or phone during sharing data. If there is a lot of data to share, the transfer may take several minutes.

- 6** The pump data is displayed on myDiabby!
You can now disconnect the phone and the PDM.

THINGS TO CHECK IF YOU CAN'T MAKE THE TRANSFER

- Check when you open the myDiabby application that you are logged in to your account: if you are logged in, you will arrive on the dashboard. If you are not logged in, you need to enter your email and password.
- Be sure to connect the phone first, then the meter second.
- When you connect the meter, it should turn on and indicate "Connected to computer".
- If the connections move a little, be careful not to touch anything during the transfer.

MYLIFE YPSOPUMP

To share data from the Unio Neva meter on myDiabby Healthcare, you need to use the mylife App.

- 1 **Download the 2 applications** myDiabby and mylife to the phone. **Log in** to each of the 2 applications.
The mylife application collects data from the Ypsopump insulin pump. Mylife will then automatically send the data to myDiabby Healthcare, which is the application that connects you with your healthcare team.

- 2 **Connect the Ypsopump to the mylife application via Bluetooth** following the insulin pump guide.

- 3 **Log in to the myDiabby application** and open the **"My connected objects"** tab

- 4 **Select "Connect my insulin pump", then "Ypsopump".** Click on the **"Connect my health application"** button.

- 5** Enter your mylife App account login details and confirm.

- 6** The data from mylife Ypsopump is now shared on the myDiabby application!

PLEASE NOTE

- All data entered manually or via Bluetooth in the mylife application is shared with the myDiabby application (pump data, blood sugar levels, meals, etc.).
- Once the Mylife and myDiabby Healthcare accounts are connected, data is regularly sent automatically. This sending may cause a delay between the synchronization of data on Mylife and their display on myDiabby Healthcare.

MEDTRONIC

MINIMED 780G + 740G

Phase 1 : Put pump data on the CareLink platform

If you use your pump with the **MiniMed Mobile** application, your data is automatically saved on **CareLink**.

Medtronic

If you are not using the application, **download the pump data from CareLink using the reader associated with the pump**. More information at : carelink.minimed.eu/app/install-uploader

Phase 2 : Sharing CareLink data on myDiabby Healthcare

Méthod 1 :

Connecting your Carelink account to myDiabby Healthcare account

From the web browser on a computer OR a smartphone:

- 1 Open the **myDiabby** application (on smartphone OR computer) and click on the «**My Connected Devices**» tab.
- 2 Click on the «**Connect a health app**» category
- 3 From the list of compatible applications, select «**CareLink**».

Connect a **health app**

CareLink™

- 4 Indicate your **CareLink identifier** in the dedicated pop-up window. This is the same login you use to connect to **CareLink** or the **MiniMed Mobile** application.

Share your CareLink data on myDiabby Healthcare

Enter your CareLink username:

This is the identifier you use on CareLink or the MiniMed Mobile application

Confirm

- 5 Go to your **CareLink account** to accept the sharing by clicking on the link in the pop-up or via the automatic e-mail you have received.

Clinic Sharing

New requests:

myDiabby Healthcare

France

75008, FR

Patient Name: test en

Pending request

Approve

Reject

Your medical provider has requested to link to your CareLink™ Personal account. When the linking process is complete, your medical provider will be able to see data from your linked medical devices that have been uploaded into your CareLink™ Personal account outside of your face to face consultations.

- 6 Once you've accepted the sharing, **go back to your myDiabby Healthcare account and the data will now be shared automatically!**

It may take a few minutes for the data to be recovered when you first connect.

NOTES

All **CareLink data** is shared on **myDiabby Healthcare** when it is shared: continuous glucose data, capillary blood glucose levels, Basal, Bolus, carbohydrates, pump information, etc.

Méthod 2 :

Recover data manually from CareLink

From the web browser on a computer OR a smartphone:

1 Go to carelink.minimed.com and **connect** to the patient account using the same identifiers as for the **MiniMed Mobile** application, or the **CareLink identifiers** directly.

2 On the CareLink website, click on :
- The **«Reports»** tab at the top left (curve icon)

- Then, at the bottom of the page, **«Export data (CSV)»**

> A .csv file containing the pump results is saved on the phone or computer.

3 Open the **myDiabby** application (on smartphone OR computer) and click on **«Enter new data»**.

4 Scroll to the bottom of the screen and click on **«Import a .csv file»** then **«Import a CareLink .csv file»**.

5 Select the .csv file that has been saved on your phone or computer from the CareLink site

6 Results from the MiniMed 780G or 740G pump and its sensor are now shared on the myDiabby application !

NOTES

All CareLink data is shared on myDiabby Healthcare when it is shared: continuous glucose data, capillary blood glucose levels, Basal, Bolus, carbohydrates, pump information, etc.

MEDTRONIC

630G, 640G, 670G, 523, 723, VEO, 530G

To retrieve the data from the Omnipod, it must be uploaded using the myDiabby Uploader software.

myDiABBY
UPLOADER

myDiabby Uploader is a software program that you can install on your computer to upload data from blood glucose meters, blood glucose monitors and insulin pumps to your myDiabby Healthcare account.

1 - Before starting, you must have:

- Created your myDiabby account
- A pump (Medtronic 630G, 640G, 670G, 523, 723, VEO or 530G)
- A **Contour Next Link** blood glucose meter (for 523, 723, VEO and 530G pumps) OR a **Contour Next Link 2.4** blood glucose meter (for 630G, 640G, 670G pumps)

2 - You can now download the myDiabby Uploader software:

See **page 55** for a **guide to myDiabby Uploader** on Windows or Mac.

Once you have downloaded and installed the myDiabby Uploader software, follow these steps:

- 1 Log in with your usual myDiabby Healthcare login details and follow the software instructions.

- 2 Select the device(s) you wish to download and confirm.

- 3 If the insulin pump and Contour Next Link 2.4 meter are connected, check the box "The meter and pump are linked".

If the insulin pump and the Contour Next Link 2.4 meter are not connected, uncheck the box "The meter and the pump are linked" and enter the pump serial number (on the back of the pump)

4 Connect the Contour Next Link 2.4 reader to a USB port on the computer.

5 Select the duration of the data to be uploaded, then click on "Send".

6 **Your data uploads to the computer.**
If the pump was not connected to the meter, you will need to confirm the connection on the pump to start the upload.

7 At the end of the upload, click on "View Data" to go to the myDiabby online platform and see all your results.

t:slim X2™

TANDEM DIABETES CARE

Method 1 :

Sharing Tandem t:slim X2™ on myDiabby via computer

myDiabby Uploader is a software program that you can install on your computer to upload data from blood glucose meters, blood glucose monitors and insulin pumps to your myDiabby Healthcare account.

myDiABBY
UPLOADER

1 - Before starting, you must have:

- Created your myDiabby account
- A Tandem t:slim X2™ pump
- The USB cable for the Tandem t:slim x2 pump

2 - You can now download the myDiabby Uploader software:

See **page 55** for a **guide to myDiabby Uploader** on Windows or Mac.

Once you have downloaded and installed the myDiabby Uploader software, follow these steps:

- 1 **Install myDiabby Uploader** on your computer, then **Log in with your usual myDiabby Healthcare login details** and follow the software instructions.

- 2 **Select the devices** you want to download and click on **Confirm**.

- 3 **Connect the Tandem t:slim X2 pump** to the computer with a USB cable.

- 4 Click on **"Send"** on myDiabby Uploader.

- 5 **The data is uploaded to the computer.**

NB > If a Dexcom monitor was connected to the Tandem t:slim X2 pump, the continuous glucose data will also transfer to myDiabby

- 6 At the end of the upload, click on **"View Data"** to go to the myDiabby online platform and see all your results.

Method 2 :

Sharing pump data with the myDiabby application with a phone

Equipment needed

The **Android smartphone** on which the **myDiabby application** has been downloaded, and patient account **logged in**.

The Tandem t:slim x2 pump.

An adapter to connect a USB cable to the smartphone.

The Tandem t:slim x2 pump USB cable.

How to proceed

1 First connect **the cable to the phone** with the adapter

2 Connect **the cable to the pump**.

3 The **myDiabby application opens directly** and data sharing starts on the application. If the application asks for permission to access the phone's USB, click «Allow», or «Accept».

4 The **cable symbol flashes** and a progress bar is displayed during data sharing. **Wait** until the transfer is complete.

5 The **pump data is displayed on myDiabby!** You can now disconnect the phone and the pump.

TouchCare Nano

TouchCare 300

MEDTRUM

- 1 **Connect the TouchCare Nano or 300 pump to the EasyPatch application via Bluetooth, or upload your PDM data to the EasyTouch application, following the insulin pump guide.**

The EasyPatch application allows the pump to be controlled using the smartphone, with the data automatically uploaded to the **Medtrum cloud**. The data available on the Medtrum cloud will then be automatically sent to myDiabby Healthcare, which is the application that provides a link with the medical team.

- 2 **Log in to your myDiabby Healthcare account from a computer OR the myDiabby mobile application.**

- 3 **Click on the tab «My Connected Objects» tab, then on «I'm connecting a health application».**

- 4 **Select the button **Medtrum****

- 5 **Enter your EasyPatch / EasyTouch account username and password. Read the terms of use, tick the acceptance box, enter your name in the dedicated field and click «Authorise» to accept data sharing.**

- 6 This message appears on the screen and confirms that the **Medtrum cloud account is connected to myDiabby Healthcare**. Click on «Back» to return to myDiabby Healthcare.

Your insulin pump data are now shared on myDiabby Healthcare!

PLEASE NOTE

Regularly check that the data from your TouchCare insulin pump is visible on the Medtrum cloud so that the medical team can see the results on myDiabby Healthcare.

> Data download is automatic on the EasyPatch application and manual on the EasyTouch application.

> Once the Medtrum and myDiabby Healthcare cloud accounts are connected, data is regularly sent automatically. **The data displayed is 3 hours behind the latest available data.**

CONNECTED INSULIN CAPS AND PENS

NovoPen® 6 and
NovoPen® Echo Plus

p53

NOVO NORDISK

NOVOPEN 6 ET ECHO PLUS

NFC connection

Data transfer is done using the NFC antenna by bringing the insulin pen close to your smartphone.

- 1 **Enable NFC on your smartphone** (in the settings)
- on some smartphones, NFC is enabled by default and cannot be disabled

- 2 Log in to the myDiabby application and open the **"My connected objects"** tab

- 3 Select **"Connect an insulin pen connect system"**.

- 4 Select **"Novo Nordisk NovoPen® 6/NovoPen Echo® Plus Insulin Pen"**, then click on **"Connect my device"**.

- 5 **The search is underway:**
 - On Android, bring the insulin pen close to your smartphone at the NFC spot.
 - On iPhone, bring your insulin pen close to the NFC spot. Your iPhone will vibrate once the pen is detected and a confirmation will appear on the screen.

A pop-up will appear with a progress bar: the pen is detected, do not move the pen transfer time

6 Select your pen and confirm your choice.

6

7 Select the insulin type of your pen: **all compatible insulins** will be shown in the list.

7

8 Your pen appears connected, press Click **“Sync”** to restore the data apply to the pen by repeating **step 5**.

Your data is synchronized with your myDiabby Healthcare account!

Daily use

1 Login to the myDiabby application

2 open the **“My connected objects”** tab

3 At the pen you have connected, press **“Synchronize”**.

4 Move your insulin pen towards the NFC antenna of your smartphone until you feel a vibration or hear a confirmation sound

5 Then **complete the data** retrieved to view it in your logbook.

MyDiabby Uploader

myDiABBY
UPLOADER

Uploading data from your devices via USB to a computer.

MyDiabby Uploader is a software program to be installed on your computer that allows you to upload data from blood glucose meters, blood glucose monitors and insulin pumps to your myDiabby account. myDiabby Uploader is compatible with Windows (from Windows 8.1) and MacOS (from MacOS 10.14) operating systems.

Uploadable devices with myDiabby Uploader:

PC Windows

1 - Installation

- 1 Download myDiabby Uploader for Windows at www.mydiabby.com/uploader
- 2 Open the .exe file that was downloaded to the computer.
- 3 Install the software on your computer following the installation steps.
- 4 The myDiabby Uploader software is now installed on your computer!

2 - Using myDiabby Uploader

- 1 Open myDiabby Uploader and log in to your myDiabby account with your usual email and password (the same as on the myDiabby application) (You can check the "Save my login details" box to stay logged in for future openings of myDiabby Uploader)
- 2 Select the devices you want to download and click on Confirm.
- 3 Connect your device to the computer via a USB cable, then click on the "Send" button.
- 4 Your device data is now uploaded to the myDiabby application!
- 5 To access your myDiabby account and view your results, click on the "View Data" button or **open the myDiabby mobile app on your phone.**

MyDiabby Uploader

myDiABBY
UPLOADER

MAC 

1 - Installation

- 1 Download myDiabby Uploader for Mac at www.mydiabby.com/uploader
- 2 Open the Downloads folder and double-click on the .dmg file.
- 3 Allow myDiabby Uploader to open on your Mac by clicking "**Open**".
- 4 This window opens: Drag and drop the myDiabby Uploader application into the **Applications** folder.
- 5 The software is now available in Launchpad. **Click on the Launchpad.**
- 6 Then on the myDiabby Uploader application.

2 - Using myDiabby Uploader

- 1 Open myDiabby Uploader and log in to your myDiabby account with your usual email and password (the same as on the myDiabby application). (You can check the «Save my login details» box to stay logged in for future openings of myDiabby Uploader)
- 2 Select the devices you want to download and click on Confirm.
- 3 Connect your device to the computer via a USB cable, then click on the "Send" button.
- 4 Your device data is now uploaded to the myDiabby application!
- 5 To access your myDiabby account and view your results, click on the "View Data" button or open the myDiabby mobile app on your phone.
