NFC connection for NovoNordisk NovoPen 6 and Echo Plus pens

Data transfer is done using the NFC antenna by bringing the insulin pen close to your smartphone.

- 1 Enable NFC on your smartphone** (in the settings) - on some smartphones, NFC is enabled by default and cannot be disabled
- 2 Log in to the myDiabby application and open the "My connected objects" tab**
- 3 Select "Connect an insulin pen connect system".**

- 4 Select "Novo Nordisk NovoPen® 6/NovoPen Echo® Plus Insulin Pen", then click on "Connect my device".**

- 5 The search is underway:**
 - On Android, bring the insulin pen close to your smartphone at the NFC spot.
 - On iPhone, bring your insulin pen close to the NFC spot. Your iPhone will vibrate once the pen is detected and a confirmation will appear on the screen.

6 **Select** your pen and **confirm** your selection.

7 **Fill in** your data:

- The time associated with the injection (breakfast, lunch, snack, dinner)
- The type of insulin injected
- If it is a priming or airshot, you can disregard the dose by clicking on «Delete airshot»

8 **Confirm.** The dose is added to your record, you can view it from your Dashboard or your logbook on the myDiabby application!

If you have gestational diabetes:

If you have gestational diabetes: once the blood sugar level appears on the myDiabby application, **CHECK** or **VERIFY** the time of day so that the result is in the right place in the logbook. You can **add comments** or insulin doses.

Daily use

- 1 **Login** to the myDiabby application
- 2 open the **"My connected objects"** tab
- 3 At the pen you have connected, press **"Synchronize"**.
- 4 **Move your insulin pen towards the NFC antenna** of your smartphone until you feel a vibration or hear a confirmation sound
- 5 Then **complete the data** retrieved to view it in your logbook.
