

LOGIN GUIDE

This login guide provides the specific login information for your device. Please refer to the manual for all information on using myDiabby Healthcare*.

Linking the pump with the myDiabby application

1 Download the 2 applications myDiabby and mylife to the phone. Log in to each of the 2 applications. The mylife application collects data from the Ypsopump insulin pump. Mylife will then automatically send

which is the application that connects you with your healthcare team.

==

YpsoPump[.]

- **2** Connect the Ypsopump to the mylife application via Bluetooth following the insulin pump guide.
- 3 Log in to the myDiabby application and open the "My connected objects" tab

4 Select "Connect my insulin pump", then "Ypsopump". Click on the "Connect my health application" button.

Share your Ypsomed mylife data on myDiabby	8
Enter your Ypsomed mylife login information: Ysomed mylfis username (small address) Passend]
Confirm	5

6 The data from mylife Ypsopump is now shared on the myDiabby application!

Enter your mylife App

account login details

and confirm

5

PLEASE NOTE

- All data entered manually or via Bluetooth in the mylife application is shared with the myDiabby application (pump data, blood sugar levels, meals, etc.).
- The data is sent regularly from the mylife application to the myDiabby application. Therefore, there may sometimes be a small delay in synchronization on the myDiabby application, which is quite normal.

/!\
